

SARAVANA L

DevOps Engineer | AWS | Kubernetes | Terraform | Jenkins | Docker | GCP

Email: saravana09052002aws@gmail.com | Call: +91 9390441805 | [LinkedIn](#) | [Portfolio](#) | [Github](#)

DevOps Engineer with ~2 years of hands-on experience in **AWS, Kubernetes, Terraform, Jenkins, Docker and CI/CD** automation. Experienced in infrastructure provisioning, deployment automation, Kubernetes platform operations and cloud-native environments across **AWS and GCP**.

SKILLS

Cloud Platforms: **AWS**(EC2, VPC, IAM, EKS, ECR, S3, ECS, CloudWatch), **GCP**

CI/CD & IaC: **Jenkins, GitLab-CI/CD, Terraform, Ansible** |

Containers & Orchestration: **Docker, Kubernetes, ECS, Helm Charts**|

Monitoring & Security: **Prometheus, Grafana, Loki, SonarQube, Trivy** |

Build & Scripting: **Maven, Bash, Python** | OS: **Linux, Ubuntu, Windows**

EXPERIENCE & PROJECTS:

Adaequare Info Pvt Ltd | DevOps Engineer (Graduate Engineer Trainee) | Feb 2024 - Oct 2025

Infrastructure Automation & CI/CD – AWS | Client: Cotality

- Automated AWS infrastructure provisioning using **Terraform modules** (VPC, EC2, Security Groups, S3), improving infrastructure consistency by **35%**.
- Designed and supported **Jenkins CI/CD pipelines** for Java applications using **Maven**, Nexus artifact management, and automated EC2 deployments.
- Integrated **Terraform + Ansible** within Jenkins pipelines to enable end-to-end provisioning and configuration, reducing setup time by **~40%**.
- Built **Docker-based Jenkins agents** with Terraform, Ansible, and AWS CLI to ensure isolated, repeatable, and scalable pipeline executions.
- Troubleshoot **Terraform validation errors, IAM permission issues, Jenkins failures, and deployment problems**, ensuring stable releases.

AWS EKS Platform Support & Observability |Client: CODA

- Managed and maintained **AWS EKS workloads**, performed pod troubleshooting, health checks, log analysis, and cluster validation activities.
- Configured Kubernetes **Ingress, LoadBalancer services, and TLS automation using cert-manager and Let's Encrypt**.
- Deployed and validated an observability stack (**Prometheus, Grafana, Loki, Promtail, Node Exporter, cAdvisor**) for metrics and centralized logging.
- Configured **IRSA and AWS EBS CSI Driver-based StorageClasses** to enable secure pod-level access and dynamic volume provisioning.
- Managed Kubernetes deployments, performed **pod troubleshooting, log analysis**, and application health monitoring.

Multi-Cloud Application Deployment (AWS + GCP)

- Deployed a **Node.js application** across **AWS and GCP** using **Terraform and GitLab CI/CD**.
- Automated infrastructure provisioning and application deployment across multi-cloud environments.

EDUCATION

B.E. Electronics & Communication Engineering | Panimalar Institute of Technology, Chennai | **2023** | **CGPA: 8.38**

CERTIFICATIONS

[AWS Cloud Solution Architect Associate \(NASSCOM\)](#)
